Please mail (see address next page) or hand out this order to our booth staff! We are happy to provide you with our newsletter.

Digitization changes everything.
It changes productivity, time to market and efficiency.
Embrace the boundless opportunities.
Realize your digital transformation with **nuIT**.

nuIT GmbH

Cernystraße 3, 3105 St. Pölten - Unterradlberg
+43 720 303 899
freetrial@nu-it.at
www.nu-it.com

nuIT provides a cloud-based platform for the fully automated sheet metal production, covering all the needs of a modern metal production company. From the mobile input of construction data to a fully automated production of parts, designed from practical knowledge of sheet metal production.

nuEvolution

With **nuEvolution**, custom trims can be ordered online directly from the construction site via tablet - quickly, easily and with high precision. Matching panels, and accessories can be ordered at the same time.

- ✓ Mobile input of detailed order data via tablet PC
- ✓ Visualize formed parts within seconds using freehand input
- ✓ True-to-detail configuration of metal trims from anywhere
- ✓ High quality drawings and 3D views in real time
- ✓ Web-based and platform independent

nuProduction

nuProduction offers smart process and machinery optimization, communicating directly to machinery for optimization of entire production chain.

- ✓ Fully automatic generation of all production data
- ✓ Direct machine communication for automatic data transfer to coil systems and bending machines
- ✓ High-performance capacity and production planning
- ✓ Production calendar for capacity and resource planning
- ✓ Scrap and cutting optimization through innovative machine control and automation

Simplify your metal trim process with cutting edge process automation from **nuIT** - smart and digital.
